Additional graphic clips available for purchase

1

your blast will arrive in two bags with all parts and hardware, including a rubber mallet for installation

2

remove the base from the smaller bag and place it on the ground

7

assemble poles making sure the hook eyelets all face the same direction

8

attach the enclosed pole eye hooks to the pole eyelets and attach the flags

3

completely open all four legs of the base and place it into position on a level location for installation

4

Your ground spikes are conveniently stored in each leg to minimize damage to the finish of the base

9

place each pole into the base starting with the center pole

5

remove ground spikes from the leg storage and pound the spikes through the holes on the end of each leg

6
